MEDICAL CENTRE
 care • respect • quality • inclusive

Bardon Rainworth Medical Centre is a well-equipped comprehensive medical centre that provides a full range of medical services to the Bardon/Rainworth community.

Medical - General Practitioner

Team Size 20+

Brisbane

The Situation

The team at Bardon Rainworth Medical Centre were battling with old and unreliable IT systems and implementations that had been done by various people over the years. They were losing valuable time performing menial IT tasks and recognised the impact this was having on the clinic.

Our Objectives

- Implement reliable systems & support.
- Introduce cyber security best practices & bolster their defence.
- Establish standardisation & improve efficiencies.
- Provide a roadmap & tailored business technology advice.

How We Helped

Over an 18-month period, the team at ADITS transitioned the Medical Centre to a secure, reliable, and fast system that rebuilt their faith in using technology.

We migrated them into Microsoft's comprehensive Cloud Platform leveraging the best of Azure and Microsoft 365.

We assisted with setting up and enabling them to be one of the first COVID clinics in SE QLD.

We introduced technology that would allow the team to work securely from anywhere in the world, freeing them up from having to only perform appointments in the clinic.

We provided peace of mind and a support team they could depend on through our 24x7x365 helpdesk.

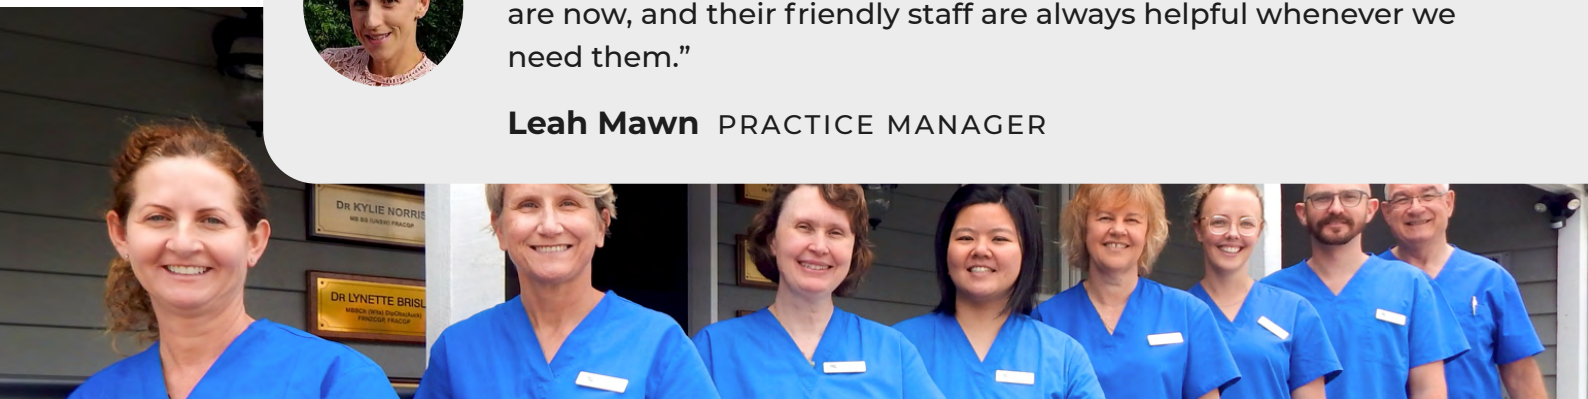

We implemented CyberShield, our bespoke cyber security solution to help minimise the risk of a security breach or incident. It also helped them comply with the Australian Cyber Security Centre's Essential 8 framework, and achieve their accreditation obligations.

"I highly recommend ADITS! We started working with the team at ADITS after a referral from another Medical Clinic and couldn't be any happier! Our IT systems have never been as reliable as they are now, and their friendly staff are always helpful whenever we need them."
